Paano nilalabanan ng bakuna ang COVID-19?

Ginagaya ng bakuna ang virus na nagdudulot ng sakit at naghuhudyat sa katawan na gumawa ng antibody. Ang mga antibody na ito ang magbibigay ng proteksyon sa pagkakataong mahawa tayo ng aktwal na virus na nagdudulot ng sakit.

Tayo na, Valenzuela!

Ligtas ba ang COVID-19 vaccine?

Oo, ligtas ang bakuna laban sa COVID-19. Mayroong iba't ibang antas ng dalubhasa na nagtitiyak sa kalidad at kaligtasan sa pagbibigay nito. Ang mga bakuna ay sumasailalim sa masusing pag-aaral at mga clinical trials. Dumadaan din ang mga ito sa FDA upang masiguradong ligtas ito.

Magkakaroon din ng screening at assessment para sa bawat babakunahan upang matiyak na sila ay nararapat na tumanggap ng bakuna.
